ABOUT ME

Portfolio: christianfugarino.com

Front-end developer with a recommendable portfolio.
Well-versed in the front-end ecosystem and quick to adopt and master new technologies that arise.

PROJECTS

Aiirlabs - *Crypto news / discussion board*

aiirlabs.com | [github](#) TypeScript | Next.js 13 | Tailwind | Firebase

- Architected a front-end service, allowing users to post comments, up/downvote, receive realtime notifications, and view latest news
- Implemented server-side rendering with Next.js 13 to improve page load time, achieving Lighthouse SEO score of 100
- Integrated React Query / Next.js 13 caching to greatly reduce server requests and load time
- Directed modeling of data and API endpoints to allow for seamless frontend integration to firebase backend

Industrial Tomb - *2D puzzle platformer game*

[play_game](#) | [github](#) JavaScript | HTML5 | CSS3

- Developed a platform game that records and updates the player's movements / interactions throughout the level
- Enhanced the code structure and maintainability by applying Object-Oriented Programming principles such as encapsulation and inheritance

Pickachu - CSS illustration

[view drawing](#) | [github](#) JavaScript | HTML5 | CSS3

- Creatively used HTML5 and CSS3 to create an advanced pokemon illustration

EXPERIENCE

Painting Apprentice

Andy Shires Painting Inc., New York, USA | May 2020 - Dec 2022

- Collaborated with lead painters to complete projects within deadlines and to the satisfaction of clients
